Supplement to Finch News, January 2026

How to use the Price Guide

This Guide to prices has been compiled by The Queensland Finch Society Incorporated to facilitate the trading of Finches. It should be stressed that the prices reflect the current market value of a parent raised pair comprising of a male and female of good quality and healthy condition.

Notes

- Interstate price variations occur.
- You may have to pay a higher price for DNA sexed birds.
- The Price Guide has no legal or moral binding.
- Sellers at all times have the right to set their own prices.

Colour Mutations

- Split birds are not listed however it is accepted that the price is 50% of the mutation.
- Pied prices reflect the amount of pied in the bird. Light pied are valued less than heavy pied.

Permits and Movement Authorities

- Finches requiring permits are the Beautiful Firetail and the Red Eared Firetail.
- All others are exempt.

Breeding Difficulty

- Birds are rated on how difficult they are to breed.
- The scale is from 1 to 5 where 1 is easy and 5 extremely difficult.
- Birds rated 3 and above may need live food for success.

Trend : Indicates variation of price per pair.

- + price has increased.
- - price has decreased
- s price static – no change
